

Eight⁺ Films

The West African films of French ethnographer **Jean Rouch** revolutionized both cinema and the practice of ethnography in the 20th century. **Docuseek** is excited to make available exclusive streaming access to eight of Rouch's most highly-regarded works, plus a biographical film. In these films Rouch developed his "ethno-fiction" and "ciné-trance" techniques. Rouch said this practice of "shared anthropology" "appears to me to be the only morally and scientifically feasible anthropological attitude today."
